## TECHNOSOFT PVT LTD

Choose the right one to make your work better

### Short Description

By Team:  
Adiyogi Technosoft (P) Ltd

## Loan Management System

The Loan Management system helps automate the entire loan lifecycle. Depending upon requirements, these programs can assist in part or whole.

The software can help with processing customer information, creating new loans, tackling exciting loans, and many more. They can also provide the exact information and reports related to the processing of loans, of the clients.

The project comprises two panels: Admin Panel and Website. Admin can monitor the activities of customers and agents through its panel.

Agents and customers/clients can work from the front side(Website). It is a dynamic website that provides modification facilities to the user. According to the requirement and needs of the user, changes can be made, this makes the system unique and also easy to use.
