## TECHNOSOFT PVT LTD

### **Short Description about E-commerce web and mobile app Development**

By Team:  
Adiyogi Technosoft (P) Ltd

## E-commerce Solutions for Web and App Development

E-commerce (electronic commerce) is the activity of electronically buying or selling products on online services or over the Internet. E-commerce draws on technologies such as mobile commerce, electronic funds transfer, supply chain management, Internet marketing, online transaction processing, electronic data interchange (EDI), inventory management systems, and automated data collection systems.

In general, buying and selling of goods and services, or the transmitting of funds or data, over an electronic network, primarily the internet.

This e-commerce consists of admin and sub-admins, Customers, Franchisee, wholesalers. Admin is a whole and sole operator. Admin can monitor all the orders that are sent or received.

Also able to change the details of the product, add unlimited products. The management of customer details and payment gateways comes under the admin role. Admins can also generate discount codes. The web portal is used by admins.

Similarly, customers and others who want to buy from the store digitally can view the details of the product. And the other facilities like adding the product to cart, to the wishlist, placing orders through different payment gateways, receiving the details of the delivery boy, before getting the product, these all activities come under the customers. The mobile app and website are used by customers.
